

Synectix®

Synectix Time & Temp Announcer is a digital voice announcer which may be used for ACD/UCD announcements, Movie Schedule announcements, answer Wake-up calls in a hotel, Time and Temperature announcements or any other application where voice announcements are required.

When a phone call is routed to the Time & Temp Announcer, it answers the call immediately (by default), plays the recorded message till the end and then terminates the call.

The unit has a built in Real Time clock and optionally a Temperature probe may also be connected to the unit. The time of the day and temperature announcements may be made along with the Wake up message or the unit may be used to make only the Time and / or the Temperature announcements.

Announcer Time & Temp
